WALKINGBUS

RIPOSITORY PHASE

All partners participated in gathering case studies related to walkingBus. During this phase 15 case studies were collected: five from the partner countries, five from the rest of Europe, and five from the rest of the world. From these case studies, important results were derived, such as that there are some success factors that should be followed by countries that lag behind, such as the following: i) the development of an online platform that functions as a national network of walkingbuses, ii) the use of ICT and mobile apps, iii) the establishment or adoption of specific national or international walking to school days or months, and iv) the connection of the walkingbus schemes to tangible objectives in each specific case.
